PROJECTS

Rangish Website

Summer 2025 – Present

- Crafted a website for a local artist with React that dynamically changes based on data stored on GitHub, which is used as a database.
- Implemented natural animations to keep site visitors engaged and utilized Google Translate for localization.
- Wrote a Flutter app that uses Git to allow the artist to easily manage the website's database.

WeatherML

Summer 2024

- Used 10 years of historical weather data from the NOAA to train a feedforward neural network with PyTorch.
- The model was trained to predict the weather in Clive, Iowa with an accuracy of ± 3 °F.

Praaccc App

Winter 2023 – 2024

- Developed a cross-platform app with Flutter for a high school swim team.
- Utilized Firebase for a real-time database and push notifications, allowing team members to add real-time ratings and reviews of daily practices.
